## EQUADIFF 7

The Czechoslovak Conference on Differential Equations and Their Applications EQUADIFF 7 was held in Prague, August 21–25, 1989.

The number of active participants of the Conference was 546 (219 from Czechoslovakia, 327 from abroad). They came from 34 countries and were accompanied by 100 persons. The scientific program included 11 invited plenary lectures, 65 invited lectures in sections (20 in the section of ordinary differential equations, 18 in the section of partial differential equations, 27 in the section of numerical methods and applications). From the invited speakers, 49 were from abroad and 27 from Czechoslovakia. Apart from them, 207 participants delivered short communications, 33 presented their results at the poster session, and 105 contributed 3-page papers to the volume of "Enlarged abstracts" distributed to all participants and serving as a basis for personal contacts and discussions.

The main interest was focused on invited lectures, both plenary and in sections. These lectures will appear in the EQUADIFF 7 Proceedings, which will be published by Teubner Verlag, Leipzig, GDR.

Thanks to the large and representative attendance, the program of the Conference covered a broad spectrum of problems from mathematical and numerical analysis, providing an opportunity for personal contacts between mathematicians from different countries, especially from the west and east.

The next Czechoslovak Conference on differential equations and their applications EQUADIFF 8 will take place in Bratislava 1993.
