In August, 3–10, 1982, a conference on Binary Systems and Ring Theoretic Methods in Universal Algebra was organized at Hradec Králové, Bohemia, by the Department of Algebra of the Charles University in Prague, the Faculty of Mathematics and Physics.

Proceedings of this conference, a collection of research papers, are being published in this journal in two parts. The first part is contained in vol. 24, 2(1983). The second part is now being brought forth in this issue.

On behalf of the Organizing Committee
Doc. Dr. LADISLAV BICAN,
Chairman
