CONTENTS.

<p>Preliminary Notice, p. 3.</p> <p>I. EUCLID'S CONCEPTION OF RATIO AND PROPORTION.</p> <ol style="list-style-type: none"> 1. Nature of the Conception, p. 4. 2. Paedagogical Exposition of the Conception. First Step, p. 7. 3. The same. Second Step, p. 9. 4. The same. Third Step, p. 10. 5. The same. Fourth Step, p. 11. 6. Parallels, a Parenthesis, p. 12. 7. Paedagogical Exposition resumed. Fifth Step, p. 14. 8. The same. Sixth Step, p. 15. 9. Paedagogical Appendix to Proportion, p. 16. <p>II. "CARNOT'S PRINCIPLE" FOR LIMITS.</p> <ol style="list-style-type: none"> 10. "Carnot's Principle," p. 18. 11. Examples, p. 19. <p>III. THE LAWS OF TENSORS, OR THE ALGEBRA OF PROPORTION.</p> <ol style="list-style-type: none"> 12. Proportion expressed by Tensors, p. 20. 13. Commutative Multiplication of Tensors, p. 21. 14. Division of Tensors, p. 21. 15. Associative Multiplication of Tensors, p. 21. 16. Results for Multiplication and Division of Tensors, p. 22. 17. Addition and Subtraction of Tensors, p. 22. 18. Distributive Character of Tensors, p. 24. 19. Applications of Tensors, p. 24. <p>IV. THE LAWS OF CLI'NANTS, OR THE ALGEBRA OF SIMILAR TRIANGLES LYING ON THE SAME PLANE.</p> <ol style="list-style-type: none"> 20. Data from the Geometry of Direction, p. 25. 21. Directionally Similar Triangles expressed by Cli'nants, p. 26. 22. Commutative and Associative Multiplication of Cli'nants, p. 27. 23. Division of Cli'nants, p. 27. 24. Addition and Subtraction and Distributive Character of Cli'nants, p. 27. 25. On the Originality of these Conceptions of Tensors and Clinants, p. 28. 26. Subsidiary Cli'nants, p. 29. 27. Some Relations of Subsidiary Cli'nants, p. 31. 28. General Exponential Expressions, p. 31. 29. Solution of General Exponential Equations, p. 32. 30. Logometric and Binomial Series, p. 32. 	<ol style="list-style-type: none"> 31. General Goniometric Series, p. 33. 32. Completion of the Laws of Cli'nants, p. 33. 33. Geometrical Construction of Cli'nant Combinations, p. 34. 34. Applications of Cli'nants, p. 34. <p>V. STIGMAT'IC GEOMETRY, OR THE CORRESPONDENCE OF POINTS IN A PLANE.</p> <ol style="list-style-type: none"> 35. No previous complete representation of Algebra by Geometry, p. 39. 36. General Conception of Stigmat'ic Geometry, p. 40. 37. Integral Stigmat'ics, p. 43. 38. Pri'mals, or Carte'sian Straight Lines generalised, p. 44. 39. Intersections of Pri'mals, p. 45. 40. Dis'tals, or Plücker's Coordinates generalised, p. 48. 41. Trilat'erals, or Triangular Relations generalised, p. 49. 42. Pencil of Four Ray'als, or the Anharmonic Properties of Rays generalised, p. 50. 43. Uniqua'drals, or the Relations of Invol'ution and Homog'raphy generalised, p. 51. 44. In'vals, or Chasle'sian Invol'ution of Points generalised, p. 51. 45. Hom'mals, or Chasle'sian Homog'raphy of Points generalised, p. 53. 46. Ray-hommals and Ray-invals, or the Chasle'sian Homog'raphic Relations of Rays, generalised, p. 55. 47. Transordination, or the Carte'sian Transformation of Coordinates and of Curves, generalised, p. 56. 48. Duo'qua'drals or Co'nals, or Con'ic Sections, generalised, p. 58. 49. Intersections of Duo'qua'drals by Pri'mals, p. 62. 50. Sym'metrals, or Conjugate Diameters generalised, p. 66. 51. Tangen'tals, Po'lals, Po'larals, Fo'cals, Confocal Centrals, and Curva-Cy'cals, or the Relations of Tangents, Poles, Polars, Foci, Confocal Conics, and Circle of Curvature, generalised, p. 67. 52. Parab'als, p. 71. 53. Multindic'ials, or the meaning in Plane Geometry of Algebraical Equations with Several Independent Variables, p. 73. 54. Solid Stigmat'ics, p. 74. 55. Conclusion, p. 76. <p style="text-align: center;">APPENDIX.</p> <ol style="list-style-type: none"> I. On the Impossible in Geometry, p. 76. II. On the Imaginary in Geometry, p. 77. III. On the History of the Conception of Stigmat'ic Geometry, p. 81.
