Corrigendum
to “Positive solutions for systems of generalized
three-point nonlinear boundary value problems”

J. HENDERSON, S.K. NTOUYAS, I.K.PURNARAS

On page 82 in the definition of L_1 and in the second and third line of page 83, γ should be replaced by γ^2 . In the numerators of the last displayed relations on page 84 γ should be replaced by $\gamma\eta$. On pages 82 and 84, $\min_{t \in [\eta, 1]}$ should be replaced by $\min_{t \in [0, 1]}$. From relation (10) and so forth $1 - \beta$ should be replaced by $1 + \beta$. In Example 1, $k = 500$, $c = 1000$ should be replaced by $k = 6000$, $c = 12000$ and $L_1 \simeq 0,972$, $L_2 \simeq 24.048$ should be replaced by $L_1 \simeq 1,053$, $L_2 \simeq 15.0025$ respectively.
