Foreword

This volume contains a part of the papers presented at the 22nd Winter School on Abstract Analysis. This Winter School was held in January 22 – February 5, 1994, at hotel “Libuše” in Poděbrady. The first week was devoted to topology, set theory and ergodic theory, the second one to analysis and Banach spaces. I owe my thanks to the participants for creating an active working atmosphere and making the Winter School useful and pleasant.

The papers in the volume were submitted for publication before March, 15, 1994. To speed the publication of the proceedings, the full responsibility for the linguistic form of the papers was left to the authors. In several papers, minor changes were done following the referee’s suggestions.

22nd Winter School was organized by the Center for Theoretical Study and Mathematical Institute of Academy of Sciences of Czech Republic in cooperation with the Faculty of Mathematics and Physics of Charles University.

The realization of this Winter School would be impossible without kind support provided by Lázně Poděbrady, Polabské mlékárny, Sklárny Bohemia, a. s., Pivovary Nymburk and Bohemia Marketing. The conference was held under the auspices of Mayor of the spa Poděbrady ing. M. Tomek.

I am particularly obliged to both secretaries of the organizing committee, Lenka Máčková and Soňa Kunová, and to the managing editor of this journal Dr. Petr Simon.

Bohuslav Balcar
