LIST OF SHORT COMMUNICATIONS

Jürgen Appell: Degeneracy phenomena for composition operators

Mehdi Asadi: Contractions in the cone metric spaces can be obtained via ordinary metric

Radek Cibulka: Exact and approximate controllability of dynamic systems

Bhavana Deshpande: Some recent developments in fixed point theory

Vagif S. Guliyev: Boundedness of the maximal operator and singular integral operator in generalized Morrey spaces

Maryia Kabanava: Anisotropic spaces as isotropic spaces on fractals

Petr Kaplický: L^q estimates for generalized Stokes problem

Turhan Karaman: Weighted fractional Sobolev-Morrey spaces and pseudo-differential operators with smooth symbols

Henning Kempka: Wavelet characterizations of anisotropic function spaces

Martin Lind: On functions of bounded p-variation

Shinya Moritoh: An integral representation formula for potentials, embeddings of Bessel-potential spaces, and Lorentz-Karamata spaces

Paolo Musolino: A functional analytic approach for a singularly perturbed Dirichlet problem for the Laplace operator in a periodically perforated domain

Ayhan Şerbetçi: The Stein-Weiss type inequalities for the B-Riesz potentials

Hossein Soleimani: Some stability results in fixed point theory for metric trees

Filip Strobin: Some porous sets of continuous nonexpansive-type mappings

Kumar Sharma Sushil: Applications of fuzzy set theory and recent development in fixed point theory in fuzzy metric spaces and L-fuzzy metric spaces

Shakro Tetunashvili: On sums of convergent trigonometric series (presented by V. Kokilashvili)

Jan Vybíral: Average best m-term approximation

Ahmed I. Zayed: Shift-invariant and sampling spaces in the fractional Fourier transform domain

Yuan Zhou: Pointwise characterizations of Besov and Triebel-Lizorkin spaces and quasiconformal mappings
